

## Policy Statement :

From a quality, environment and safety point of view, Bruxelles-Energie wishes to abide by the following rules :

- Take the adequate precautions to minimize the risks to people, the environment and the end products.
- Meet the current regulations requirements from a safety and environment point of view as well as any other requirements to which Brussels Energy is committed
- Safety measures will be taken in the following priority order :
  - Avoid risks
  - Reduce risks
  - Limit damages
- Use the best economically justifiable technologies for waste incineration.
- Be faithful to what has been contractually agreed for the incineration of household and similar waste, while respecting environmental regulations.
- Offer an efficient and transparent service.
- Offer an alternative allowing for a controlled waste clear out during a shutdown of the incineration installation.
- Thrive for continuous improvement thanks to the commitment of all the collaborators.
- Assist in the Brussels waste management policy through the treatment hierarchy represented by the « Lansink ladder » :

PREVENTION

REUSE

RECYCLING

INCINERATION with energy recovery

INCINERATION

LANDFILLING

- Formulate and assess annual goals for safety, quality and environment.
